The Threshold Learning Outcomes for Chemistry

| TLO 1. Understanding the culture of chemistry | Understand ways of scientific thinking by: | 1.1 recognising the creative endeavour involved in acquiring knowledge, and the testable and contestable nature of the principles of chemistry  
1.2 recognising that chemistry plays an essential role in society and underpins many industrial, technological and medical advances  
1.3 understanding and being able to articulate aspects of the place and importance of chemistry in the local and global community |
| TLO 2. Scientific knowledge | Exhibit depth and breadth of chemistry knowledge by: | 2.1 demonstrating a knowledge of, and applying the principles and concepts of chemistry  
2.2 recognising that chemistry is a broad discipline that impacts on, and is influenced by, other scientific fields |
| TLO 3. Inquiry, problem solving and critical thinking | Investigate and solve qualitative and quantitative problems in the chemical sciences by: | 3.1 synthesising and evaluating information from a range of sources, including traditional and emerging information technologies and methods  
3.2 formulating hypotheses, proposals and predictions and designing and undertaking experiments  
3.3 applying recognised methods and appropriate practical techniques and tools, and being able to adapt these techniques when necessary  
3.4 collecting, recording and interpreting data and incorporating qualitative and quantitative evidence into scientifically defensible arguments  
3.5 demonstrating the cooperativity and effectiveness of working in a team environment |
| TLO 4. Communication | Communicate chemical knowledge by: | 4.1 presenting information, articulating arguments and conclusions, in a variety of modes, to diverse audiences, and for a range of purposes  
4.2 appropriately documenting the essential details of procedures taken, key observations, results and conclusions |
| TLO 5. Personal and social responsibility | Take personal, professional and social responsibility by: | 5.1 demonstrating a capacity for self-directed learning  
5.2 demonstrating a capacity for working responsibly and safely  
5.3 recognising the relevant and required ethical conduct and behaviour within which chemistry is practised |
